Getting Started.....

Note: The 63-87 C-10's have similar control arms through the years, but the balljoints used were different. The year breaks are as follows: 63-70, 71-72, 73-87. Be sure to use the correct balljoint for the year of spindle you are using.

Balljoints:

- | | | |
|---------------|----------------|----------------|
| 63-70: | Upper-90000911 | Lower-90000912 |
| 71-72: | Upper-90000902 | Lower-90000909 |
| 73-87: | Upper-90000910 | Lower-90000909 |

Installation

1. Install the balljoints into the upper control arm with the hardware supplied with the balljoint. The upper balljoint goes in from the top side of the control arm. The gussets on the balljoint plate point up. Torque the hardware to 20 ftlbs.

2. Diagram "2" shows the Driver Upper Control Arm. This is looking at the control arm from the top.

3. Remove the OEM upper control arms from the truck. Fasten the control arms to frame using the stock hardware. Reuse the alignment shims; however the truck must be realigned after installation. Torque the nuts to 70 ft-lbs. The upper cross shaft nuts can be torques to 55 ft-lbs.

4. Grease the upper balljoints.
