

### **Parking Brake Info for 1963-1979 Corvette using Ridetech Hub Style Trailing Arms**

Requires the customer to purchase the following C7 parking brake components from GM or donor car.

(1) 23332142 – Driver Side Backing Plate

(1) 23332143 – Passenger Side Backing Plate

(2) 84167853 – Parking Brake Lever

(2) 22857908 – Hold Down Spring Kit

(2) 22857916 – Adjuster

(2) 22857907 – Brake Shoe Kit

- Uses modified factory parking brake cable, grind the ball on the end of the cable down to fit the C7 Lever.
- The Shoulder of the rivets on the backing plate also need to be ground down to clear the trailing arm.
- Compatible with Wilwood C7 Aero brake kit 140-13698. This kit uses 14.25” rotors, verify wheel clearance.
- If a smaller rotor is required the Willwood C5/C6 brake kits can be used, such as 140-8032 (12.88”) or 140-9119 (14”), however C7 Hats (170-11306) and hardware kit (230-8217) must also be purchased to be compatible with the C7 brake shoes.
